PROFILE

To pursue a challenging role as a React.js Developer in a dynamic organization that fosters growth. With 2.3 years of experience, I am dedicated to applying my expertise in React.js, JavaScript, HTML, CSS, and frameworks like Redux to contribute meaningfully to the team's and organization's success. Additionally, I possess skills in design tools like Canva, enabling me to create visually appealing and user-friendly interfaces.

WORK EXPERIENCE

2022(DEC) - PRESENT

Vanmayi Technologies Pvt Ltd | Hyderabad

Frontend Developer

- Crafting interactive and responsive user interfaces using React.js, ensuring a seamless user experience across devices.
- Creating modular components and front-end libraries for efficient code reuse and maintainability.
- Converting UI/UX designs and wireframes into high-quality, functional code
- Enhancing component performance for optimal functionality across various devices and browsers.
- Working closely with designers, back-end developers, and stakeholders to ensure cohesive product development.
- Keeping abreast of the latest React.js features and industry trends to implement best practices.
- Identifying and resolving issues, conducting performance tests, and ensuring web design optimization for various devices, including smartphones.
- Employing front-end development tools such as Babel, Webpack, and NPM to streamline development processes.
- Managing application state effectively using React.js workflows like Redux or Flux.
